***Specification***

1. Applicants are requested to amend the continuing data in the specification to update the status of the parent application.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-8,11-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1,11,24 "alkali oxide" should be "alkali metal oxide". Alkali is a measurement of pH.

Claims 2,12,25 "the dominant crystalline phases" lacks antecedent basis.

Claims 3,13 and 28,  $K_2O$  is not a compound.

Claims 19-23,26,27 the terms "the porosity", "the water absorption", "the compressive strength", "the loss" and "the gain" lack antecedent basis.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1755

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1,3-7,11,13-23 are rejected under 35 U.S.C. 102(a or e) as being anticipated by Nagata et al (6,642,162 and 6,645,981), each taken alone.

Nagata et al '891 see examples 03 and 25.

Nagata et al '162 see examples 07,09,11,12,25,27.

Also .1-9 wt% K<sub>2</sub>O and/or Na<sub>2</sub>O are added, see '162 claim 13.

Products of identical chemical composition cannot have mutually exclusive properties. In re Spada, 15 USPQ2d 1655,1658 (Fed. Circ. 1990). The claims are considered anticipated.

6. Claims 1,2,5-8,11,12,15-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Tamura et al (4,792,537).

See examples in table 1 which fall squarely within the claimed ranges. The composition once fired includes forsterite and spinel, column 4, lines 35-37. The claims are considered anticipated.

7. Claims 24-33 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
